Creative Web Design

Web Design

Website is the face of your business.

We are a professional team who are creative, driven, and solution oriented. We design your website to represent your presence on the web in ways that are up-trend and market defined. **Since 2001**, we have been working with a wide array of clients and technology, this collective experience has enabled us to provide the right solution for your needs.

We build websites for you that engage your target audience and empower your business to achieve most and more. Our capable team has the skill and experience to deliver the correct solution that work for your business.

Our creative web design solutions vary as per the client requirement, they are industry catered and as per the current trend. We specialise in **Business website, Commercial websites with payment gateway, Responsive websites, Website redesign, Catalogue based websites** and much more.

Why create a website with us

- We believe business **success starts with great a website** and since we understand its value, we care for your business growth by providing the best possible solution that will work for you.
- Starting with our process to the quality of work delivered, we are professional in our approach and we deliver professional results.
- We care enough to suggest you what will work best for your requirement.
- Our presence in the industry will ensure that we will always be available for your website needs, updates, maintenance and redesign.
- We take responsibility for our client's growth through the web and our support stands by it.
- We offer various solutions that will cater to your need.

Prominent web design solutions offered by us includes:

- **Business web-design solutions**
- **Responsive web-design solutions**
- **CMS web-design solutions**

Business web-design solutions

Our solutions for web-design are diverse which addresses the specific need for a customer based on their industry segment and the type of solution that is required. In general any business be it small or grande, requires dedicated website that targets a specific set of audience. It is essential to understand the target and present an appealing website that will solve the business purpose.

We at J B Soft System understand this. Using our expertise and experience, we suggest the adequate web-design for your business.

Business web-design is suitable for a single professional who wants a portfolio website or a multinational corporation that requires a vast corporate portal. The choice here can be **a simple static website** or **an advanced website with content-management system** for frequently changing content. We offer both custom web designs as well as template based **responsive designs**.

Get the gateway to your business set up on the web, reach millions across borders and grow your business.

We help you along every step to get your business online.

Even if you have a website that is already created but you feel that you want it to be in trend as per the latest standards, we are here to help you **redesign and restructure** according to the current market.

Responsive web-design solutions

In India 79% of the internet traffic is through mobile devices. At this rate any business should have their website catered to the mobile audience and be there in a presentable way when your target customer searches for you on their smartphones.

We at J B Soft System, help business to develop **mobile friendly websites that meets all standards**. Even if you have a website that is not responsive on other internet devices, we have responsive design solutions to make it work for you. As per google's latest search algorithm, they filter out mobile responsive websites and bring it up on search when users search on the mobile.

Our experts understand this well and deliver **responsive lightweight web-design solutions** that is specific to its purpose. One can choose a mobile specific design layout or a responsive web design that fits all devices.

Since responsive web-design is considered a best practice on internet, we offer this for all our new web-design solutions by default. But if you happen to have a website that was developed without a responsive layout, we will help you in converting the same to a responsive web-design.

We ensure consistency across device screens, be it small or big.

Benefits of having a responsive website:

- **Improved search ranking** and established online presence on the web
- Fix domain name - you don't have to worry about having multiple websites for mobile and desktop
- Lower bounces because of **structured content presentation** on the website

CMS Web-design solution

Ever since the dawn of internet to till date, websites have been the most effective marketing tool. On these websites, the one thing that ensures your target traffic is driven towards you and enables you to conduct business is the content. **The content is the king.**

To have an ever green, updated and apt content on your website, a content management system is much required. We at JB Soft System prefer in utilising the features of the **Wordpress backend system**, thus offering CMS websites on Wordpress with the latest trend, technology and security.

The CMS solutions offered by us are hassle free and can be learnt in minutes, thus providing business owners the edge to keep their website always updated. With **advanced blogging features**, you can push frequent posts that will help the target audience and to generate more business.

Content management system solutions can be applied to websites where

- Many pages are needed
- Multiple plugin integration is required
- Better SEO management of the website is required

Benefits of content management system

- Easy access to maintain websites and update the whole platform
- Minor corrections can be made in few minutes
- Unlimited no.of page creations
- Easy upload of media on the website
- Easy integration of plugins to optimize the website
- Better SEO functionalities
- Editing with CMS possible on any device, anywhere

Web Maintenance

Having a website or a web application online is the first step to gain results for your business on the web, it doesn't end there, the actual process and responsibility starts there. **Pure success depends on how well your website or web application is maintained on the web.** We at J B Soft System, provide web maintenance as a core service where we take your responsibility of maintaining your website with the required standards and attention.

With our web maintenance packages **you can focus on your business** while we act as your web partner to take care of your website by managing the same with the professional touch.

We extend our support to be available when your website needs updates, fixes, redesign, etc. We provide **priority support** for your queries on achieving better online results.

Moreover we take care of the following:

- Retaining your web originality of the website.
- Maintain your website and hosting by updating the core, ensuring uptime and security.
- Provide immediate assistance for restoration in case of any issues.
- Provide support on minor updates and fixes.
- Keeping your on-page details updated.
- Timely updates and reminders for your domain and hosting.
- Support for your hosting server, mail servers and analytics.
- Overall proactive support.

We even offer **advanced web maintenance packages which covers generic website maintenance, digital marketing support and social media assistance.**

Web Applications

The advent of internet technology has completely changed the way how businesses operate. **Information Technology plays a very vital role in any business** or any activity that we come across in our day to day lives. It has come to a stage where there is no business growth without leverage of IT. We live in a generation where internet is given importance equal to that of any basic element for survival. Businesses are evolving to make use of this opportunity by creating web applications that will work for them and their customers. Businesses move away from their traditional processes and go towards the cloud for operation, automation and data assimilation.

At J B Soft System, we help businesses to achieve their goals on the web. Our abled professional developers and tech team can clearly understand your needs, draft a base requirement to develop, deploy and deliver the appropriate web solution. Our full fledged team of analysts, designers, developers, user interface experts, quality controllers and project managers are dedicated to deliver results. They utilise technology and make it work for your business while ensuring your return on investment and long term success.

The project processes adapted by our teams are specific to the client and requirement. Our flexibility and understanding ability is driven to deliver results for you.

Our core expertise is in delivering applications developed in **PHP and MySQL**.

Having experience in developing multiple projects for customers across the globe, we can strongly assure to provide the right solution for you.

Prominent web application solutions offered by us includes:

- **Custom web applications**
- **e-Commerce web solutions**
- **Matrimony web solutions**

Custom web applications

Customised web applications are the need of the hour. Websites are essential to put your business front on the web, but from there if you require **additional functionality or sophistication that is to be provided to your team or your customers**, custom web applications is required. Our team at J B Soft System can capture your exact requirement for this and deliver the additional functionality required.

For over a decade J B Soft System has been delivering organisations of different scale with premium quality and affordable IT solutions. The scale of custom web application can be either small or large, we are capable enough to handle the requirement. We also deal with 3rd party integrations and API implementations for the same.

We are sufficiently experienced and have hands on knowledge working on projects involving APIs of **Ebay, Amazon, AWS, Facebook, MailChimp, SMS gateways, Payment gateways**, etc..

We offer quality support and dedicated maintenance for VPS, Cloud Servers and Dedicated Servers with your preferred data center.

- **Google cloud**
- **AWS**
- **IBM Softlayer**
- **CTRLS**
- **Microsoft Azure**

Personal and enterprise email solutions

Although digital technology has evolved to a greater extent where new modes and channels of communication is popping up every day, emails have always been the most essential form of formal communication. Till date email solutions are also growing in terms of added features, flexibility and simplicity.

Any business small or large requires professional email address. It establishes your brand, your professionalism and also adds value to your communications. Thanks to the large players like Google and Microsoft, the email channels are more stream lined and feature rich.

J B Soft System with its partner networks can provide personal and enterprise email solutions with the following cloud solutions:

- **Gmail**
- **Google Apps for work**
- **O365 - Office 365**

Google apps and service solutions

We provide Google app solutions for any number of users. As an authorised reseller we can provide you with google for work solutions, support you in its implementation and provide administrative assistance.

Email campaign management solutions

Email campaigning to your customers and authorised leads have been a standard marketing operation since long. But with the advent of newer spam filters and complicated processes, this job got a bit more complex. This is where J B Soft System has a simple email campaign management solution for your business with the aid of AWS SES mailing platform.

This campaign system is specific to be used for a very large group of email ids. Although this bulk mailing solution is specific to genuine user mailing and mail list management, the features associated with it is a compelling reason to opt for.

Benefits of our email campaign solution

- AWS based mail delivery - so 100% delivery of email to genuine ids
- Mailing list management
- Campaign mail scheduling
- Flexible plans with only constraint of number of mails sent and not the number of contacts addressed
- Unsubscribe options
- Report of bounces and mail opens on your campaign
- Service and support by J B Soft System

Apart from our standard solution we also provide on-demand MailChimp or MailJet integrations to your CMS website.

AWS implementations

Amazon Web Services has taken the cloud market by large and has become a preferred solution by many businesses for startups to corporates. J B Soft System as a partner can help in leveraging AWS advantages.

We provide dedicated support in implementing AWS solutions for your business.

Services available in AWS

- Compute
- Storage
- Database
- Migration
- Networking & Content Delivery
- Developer Tools
- Management Tools
- Security Identity & Compliance
- Analytics
